

Works notice: Tuesday 19 November 2024

Temporary helicopter landing site test flight

From Tuesday 19 November 2024 helicopter test flights are expected to commence on the temporary helicopter landing site (HLS) located on the rooftop of the RPA Hospital Staff and Visitor Car Park.

During the test flights, a helicopter will arrive and depart from a variety of directions based on both wind conditions and air traffic clearances issued by tower control at Sydney Airport. Some noise and wind can be expected during the test landing and take-off.

The test flights are part of the final activities planned as part of the construction of the temporary HLS. Following construction completion, the temporary HLS is expected to commence operation from December 2024 and will be in use for approximately 2 years.

The flights are expected to occur during the day and night. Pedestrians are advised to avoid the area during helicopter movements and to follow any instructions around the flight zone.

Find out more about the temporary helicopter landing site and the operational plans in the **Fact Sheet** and **FAQs** on the **project website**.

Works will involve:

- Helicopter landing and take-off on the roof of RPA Hospital Staff and Visitor Car Park
- Noise and wind from helicopter downwash within the helicopter exclusion zone

More information

The health, safety and wellbeing of staff, patients, neighbours and community is our highest priority. For any queries relating to this work, please contact the RPA Redevelopment Team via email RPAredevelopment@health.nsw.gov.au or phone (02) 9978 5901.

We thank you for your patience and cooperation while we complete these important works.
