

Works notice: Thursday 21 November 2024

Temporary helicopter landing site test flight

On Thursday 21 November 2024 a helicopter test flight is expected to occur late in the evening on the temporary helicopter landing site (HLS) located on the rooftop of the RPA Hospital Staff and Visitor Car Park.

Following the success of the day time test flight undertaken on Tuesday 19 November 2024, a night test flight is required to finalise the construction of the temporary helicopter landing site.

Due to the helipad's close proximity to Sydney Airport, the flight is dependent on air traffic approval and is expected to occur after 11.30pm when the Sydney Airport curfew commences.

During the test flight, a helicopter will arrive and depart from a variety of directions based on both wind conditions and air traffic clearances issued by tower control at Sydney Airport. Some noise and wind can be expected during the test landing and take-off.

Following construction completion, the temporary HLS is expected to commence operation from December 2024 and will be in use for approximately two years. Find out more about the temporary helicopter landing site and the operational plans in the [Fact Sheet](#) and [FAQs](#) on the [project website](#).

Works will involve:

- Helicopter landing and take-off at night on the roof of RPA Hospital Staff and Visitor Car Park following Sydney Airport curfew
- Noise and wind from helicopter downwash within the helicopter exclusion zone

More information

The health, safety and wellbeing of staff, patients, neighbours and community is our highest priority. For any queries relating to this work, please contact the RPA Redevelopment Team via email RPAredevelopment@health.nsw.gov.au or phone (02) 9978 5901.

We thank you for your patience and cooperation while we complete these important works.
