

RPA SOCIAL PINPOINT

FACT SHEET - AUGUST 2023

The NSW Government has committed \$750 million to the redevelopment of Royal Prince Alfred (RPA) Hospital to deliver a new hospital building and refurbishment of existing spaces. It is the biggest transformation of RPA in its 140-year history of caring for our community.

The redevelopment of RPA will provide a range of enhancements for staff, consumers and the community, including:

Expanded and enhanced Emergency Department and Intensive Care Units

State-of-the-art operating theatres

Expanded and improved adult inpatient ward accommodation

Increased interventional and imaging services

Expanded neonatal intensive care services

Improved public domain and services including roads, wayfinding, landscaping and information and communications technology infrastructure

The RPA Redevelopment project now has a new interactive map to help keep you in the know. Please visit **Social PinPoint** to view the changes and construction activities occurring at RPA.

We're committed to keeping staff, patients and visitors informed and updated. Social Pinpoint's interactive map feature is a tool that will display current construction activity and the impacts it may have.

Users can navigate the map, zoom in/out, and explore different areas and features of the site and the redevelopment works. With markers, pins, drawing tools and annotations, the map will display existing conditions, proposed changes, and key hospital access points, to ensure the community is kept safe and informed throughout construction.

The Social PinPoint interactive map will be updated regularly as works progress, so you can see the changes happening on site.

Community engagement

Community is at the heart of the RPA Redevelopment, helping inform key outcomes for the future of healthcare at RPA. As we progress towards main works construction, we're excited to be bringing you a new way to facilitate community engagement. We will continue to use tools that make it easier for staff, community and visitors to understand the project and its implications, provide opportunities for feedback, and share their local knowledge.

Our diverse communities and stakeholders play a vital role in shaping our infrastructure projects. Harnessing local knowledge can improve project outcomes and create lasting positive impacts that transform communities. By using a range of tools, we are working to ensure that community members, staff and consumers are informed about this important project and have opportunities to provide their feedback and input.

What is Social PinPoint?

Social Pinpoint is a community engagement and consultation platform that allows local governments, organisations, and businesses to inform residents from residents, stakeholders, and the general public.

Why use Social PinPoint?

The platform facilitates communication between decision-makers and the community.

The project will be utilising the interactive map to provide the latest news on impacts, changes, and campus activities to continue to inform and engage staff, patients, visitors and the community.
